### PROJECT

#### LeMacaron - Ecommerce shop

An independent project I did towards the end of my studies

- Online store for baking products (mainly "macaron" cookies)
- Technologies used in the project: Node.js, MongoDB, TypeScript, JavaScript, HTML5, CSS, Bootstrap, React.ts.
- The site has many types of functions that allow you to easily control the site and update data through the client side to the server side.

#### BCard - B2B share platform

An independent project I did in the middle of the course

- Platform for sharing business details with other businesses
- Technologies used in the project: Node.js, MongoDB, TypeScript, JavaScript, HTML5, CSS, Bootstrap, React.ts.
- The site is built on the basis of a client base, so that its use will be the simplest and most convenient for new users.
